

UN CLIMATE CHANGE CONFERENCE (COP27) 6-18 NOVEMBER 2022, EGYPT

OCEAN PAVILION SIDE EVENT

“Ocean observations for climate change: How do we train and educate the next generation of scientists and citizens?”

Thursday 17th November 2022, 15:00 - 16:30 EET

Programme

We will focus on the crucial elements that are capacity development and ocean literacy, key to implementing a truly global ocean observing system. It will provide examples of successful initiatives and showcase efforts to increase societal awareness of climate change and its intrinsic link to the ocean. Panellists will discuss the challenges of training the next generation of ocean observers, of bringing ocean observations to the classroom and of highlighting their importance to policy makers.

15:00	Sophie Seeyave (Moderator) Welcome and introduction of speakers
15:05	Moumini Savadogo Capacity development for climate change and ocean observations in Africa
15:10	Lilian Krug Taking young scientists to sea and bringing the ocean to the classroom
15:15	Allison Cusick Outreach and citizen science in the polar regions
15:20	Adam Gristwood Using storytelling to inspire and engage people with ocean science
15:25	Ximena Aguilar Vega Combining art and science to raise awareness of the importance and plight of the polar regions
15:30	Moderated discussion
15:45	Audience Q&A
15:55	Wrap-up and session closure
16:00	End of session
