

Fellowship Programme 2024

Objectives

- Promote training and facilitate global capacity development
- Advance sustained global ocean observations and their application

What does the fellowship offer?

Funding to spend between one and three months at another oceanographic institute, anywhere in the world, to receive training on any aspect of oceanographic observation analyses and interpretation. The fellowship is NOT intended for an academic course of study, or for research.

What is needed to apply?

- Application & proposal forms
- Letter of recommendation
- Letter of acceptance from prospective host
- Quote for flights

Who can apply?

- Scientists
 - Technicians
 - Postgraduate students
 - Post-doctoral fellows
- ... from developing countries and countries with economies in transition.

Priority is given to early-career scientists

María Mendez (2021 Fellow)

What is covered?

- International airfare
- Transport from airport to host institute
- Contribution towards living expenses

What is NOT covered?

- Domestic travel in home country
- Visa costs and insurance
- Salary/bursary
- Training costs

Tobias Servulo (2023 Fellow)

Priority Areas

- Fixed-point time-series observations (e.g. contributing to OceanSITES, OBIS and/or other shared data systems)
- Large-scale, operational biological observations including biomolecular and biodiversity (e.g. biological EOVS, CPR, OBON and other programmes)
- Open and coastal ocean observation modelling and management
- Emerging and low-cost technologies for ocean observations
- Optical measurements of living and non-living particles
- Physical, biological and biogeochemical sensors on floats and gliders
- Underwater sound, acoustic observations and modelling
- Floating litter observations and modelling
- Data management & time series analysis

Andrés Rondon (2020 Fellow)
